

23 March 1983

MEMORANDUM FOR THE RECORD

SUBJECT: IB Accounting Computerization

STAT On this date, the undersigned talked with C/Audit Staff,
[redacted] regarding the possibility of the Audit Staff
conducting a survey of IB bookkeeping and accounting functions and
STAT making a recommendation with respect to an appropriate computerization
system for the Branch. [redacted] explained that the Audit Staff was
really not in a position to perform this type of service. He stated
that such action could be construed as conflicting with their primary
functions. Audit Staff reviews systems as they are being developed and
audits them once implemented, therefore, it would be a conflict for them
STAT to recommend and develop systems for which they have audit responsibilities.
